

Value-Add Services

CCS as a "Virtual" Branch of Your Company

CCS-Inc. is committed to solving business problems through custom engineering, integration, and logistics services. By choosing CCS as a single-source partner for your computer-related needs, our team becomes part of yours.

Software:

- Image maintenance
- Custom installation scripting
- Embedded operating systems

From initial installation to updates and maintenance, our engineering staff provides knowledgeable support and customized solutions that allow you to "plug and play."

Hardware:

- Custom chassis design
- Life cycle management
- Custom system design

With our design capabilities, there is no need to settle for off-the-shelf products that do not meet your needs. We work with you to create hardware solutions based on your specifications and offer roadmap services to help plan for the future of your products.

Integration:

- Custom enclosures to protect your hardware
- Network design, equipment, and installation

CCS provides not only the pieces to solve your puzzles, but also puts them together for you. Our engineers integrate all the necessary components into one seamless design.

Complete Turnkey Solutions:

- Configuration control
- Worldwide fulfillment
- Online Customer Care Center - Order tracking portal
- Compliance documentation management (RoHS, CE, etc.)
- Piece-by-piece tracking
- Custom branding, packaging, palletizing
- Warranty management and extended service

CCS manages your solution from beginning to end. We take the hassle out of multi-unit orders, international shipments, and lifecycle management so that you can focus on the things that drive your business.

Do you have design requirements that require a custom solution?
